

# Sony TU-1041U Tuner

Sony's discontinued workhorse single antenna high quality analog TV tuner available used only. Punch in a number, press ENTER and the channel is set. The tuner remembers the set channel next time you power it up. 181 NTSC channels incl. CATV including Cable channel 59. The latest models have manual fine-tuning. This is a rugged steel case tuner. Runs for 6 hrs on an internal Lithium NP-7L.

Power: 110V AC or 12V DC draw 1A on 4pin XLR plug on its side or insert NP1 type battery, 75  $\Omega$  Antenna "F" connector input is replaced by **custom BNC antenna in connector**, BNC video out, Audio RCA out, NTSC only. Solid tough steel case, size: 8-3/8x2x14 1/4". Package incl.: Tuner, AC cable, 1041U manual, and UHF operator manual. Sometimes we have some with cosmetic damage, call for discount prices.

**ONLY used ones left! TU-1041U with fine-tuning Blow Out Price! \$ 50.00**

## WSV Shark Fin Antenna

Log Periodic CH. 14-69, Hi gain and clean signal in small convenient package, fits into front of PortaBrace Bag for 1041. Eliminates much of multipath and flicker due to directional characteristics. Covers all of UHF band 400-1000 Mhz.

**\$ 175.00**

## PortaBrace Protective Bag

It has a front pocket for antenna and an accessory pocket for extra cables. Velcro loops in near to fasten to "C" stand. Perfect to gang tuner on the same stand that antenna is mounted on. Now you never need a cable longer than 12ft. to the antenna. This keeps signal loss down and makes for strong solid images. Fits the diversity 404 tuner and the Sony 1040 single antenna. A few used left in stock!

**\$ 50.00**

## MOD-QUAD 4 ANTENNA UHF NTSC DIVERSITY TUNER

MOD-QUAD with two remotes

The tuner is controlled by the remote only. Our field tests show this tuner to be as good as any other 4-antenna diversity. Antenna switching is not visible. Performance is as good as the 404 that's no longer available. Power cable (4XLR-M) to custom Lemo – you need one: \$ 110.00, add'l. charge. New Model in 2010 with new connector and better remote.

List price approx **\$ 1450.00**

## Tuner Sony UHF Diversity

### Diversity Tuner Stand Alone Box with 4 antennae inputs & one selecting receiver.

Professionally packaged in 12"x10"x4" bulletproof steel box with 4XLR 12V power in and aux output. Protected with fuse, spike and overvoltage protection, four BNC antennae in, one BNC video out, 3XLR (unbalanced) audio out. Included is external 12V @ 1A power supply for 110VAC.

Packaged in soft bag included.

This Diversity Tuner is the ultimate in TV reception. The tuner automatically selects which antenna has the best signal (based on a Sony secret algorithm) and imperceptibly switches up to 60 times a second. This eliminates a lot of multipath (flicker) in a moving transmitter situation. The antennae should be spaced by ideally 4 feet. The better the antennae, the better the reception. Use RG-8X cabling. Mount at least 2 antennae to take advantage of diversity.

Tuner in case is a Sony RMX-14 made for Japan. The channel number displayed is one number below the actual USA channel. Our NTSC frequencies are assigned to a one higher channel number than the Japanese NTSC frequencies. The channel display unit is on a 10-foot cable retracted inside the case. It has a protective handle above it. Perfect fit for Pelican 1550 Case (not included). Also check 4 diversity tuners in one box:
